Ok, I'll be working late this afternoon/evening so why don't you just give me a call when you're free after 2:00 your time.

Matthew Tejada

Director - Office of Environmental Justice

Environmental Protection Agency

Let's definitely talk. I'm responding to the mine breach this morning (we are down 2 CICs who are responding), but should be free(er) after 10:30 AM (PT).

What's going on here? Is there something OEJ can do to help?

Heart broken and unable to understand what EPA is doing to its relationship with us
Gonna take it to the people

Residents already feel EPA is hiding the truth on vi, ad reported in the l a times and local news
coverage and this latest breach of

Not having their advisor, Dr. Wells, at the meeting on the 13 because staff is incapable of getting
paperwork in order is not only unacceptable it is a huge breach of trust

We are totally at an impasse

So mad I am afraid of what actions will be taken because of this total lack of concern for the
community needs

Not getting this handled because of the endless staff vacations is pathetic

Not ending here

It's the TASC issue Yolanda explained last week, so really not a surprise. Unfortunately.

Jared is traveling to Nevada tonight and then to Navajo Nation to deal with the Gold King
mine issue. I

Doubt he'll be reachable. If you feel the need to elevate prior to Thursday, John Lyons is
the likely best contact.

I'm in the office all day tomorrow.

If the world was only a few feet in diameter, floating about

a field somewhere, people would come from everywhere to marvel at it. People would walk around it, marveling at its big pools of water, little pools and the water flowing between the pools. People would marvel at the bumps on it, and the holes in it, and they would marvel at the very thin layer of gas surrounding it, and the water suspended in the gas. The people would marvel at all the creatures walking around the face of the ball, and at the creatures in the water. The people would declare it precious because it was the only one, and they would protect it so that it would not be hurt. The ball would be the greatest wonder known, and people would come to behold it, to be healed, to gain knowledge, to know beauty and to wonder how it could be. People would love it, and defend it with their lives, because they would somehow know that their lives, their own roundness, could be nothing without it. If the Earth were only a few feet in diameter
